Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

The amended drawings filed 30 April 2003 are not accepted. The subject matter of Fig. 5 is acceptable to overcome the below objection, however, it is improper to provide two timing diagrams in a single figure. It is suggested that this figure be amended as Figs. 5a and 5b, with corresponding changes in the specification.

Therefore, the drawing objections (restated below) are not overcome.

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the “pulses” of “same currents with opposite polarities” of claims 25 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. §102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless —

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 5-18 and 21-25 are rejected under 35 U.S.C. §102(b) as being anticipated by Chan (cited by Applicant). Chan discloses, in Figs 2-4, a method having the steps of “passing a current limited pulse (pulse 210.1 of Fig. 2)”; and “passing a second pulse (pulse 210.2 of Fig. 2)”, providing the operation as recited by Applicant. Reference is made to Cols. 3-4 of Chan

Art Unit: 2816

which express that the provision of I2 being less than I1 is merely as an example. It is clear from Cols. 3-4 of Chan (as well as other portions thereof) that the disclosed circuit is not limited to I2 being less than I1. It is further clear that one skilled in the art will get similar results wherein I2 is greater than I1, however, the reduction of resistance of the will not be as consistent.

Examiner has considered Applicant's remarks for the above rejection and has not found them to be persuasive. Examiner disagrees that "Chan does not...implicitly teach" the claimed subject matters. Examiner has considered the portions for the Chan reference discussed by Applicant, however, none of these portions are seen to contradict the above rejection. As an example, Col. 4, lines 8-16, states that "The second pulse 210.2 reduces the antifuse resistance more consistently if current I2 is lower in magnitude than current I1". It is more than clear from this disclosure that if I2 is higher than I1, the antifuse resistance will be less consistent. From this and the rest of Col. 3-4, it is understood, by clear implication, that I2 can in fact be higher than I1, although the result will be less consistent.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
